The Pulp Mill, Government Tank, Northeast Willow, and Cottonwood Pastures will be rested this grazing year. The desired utilization level for the 2019 grazing season will be 25% on herbaceous forage species, 20% of terminal buds on riparian trees, and 45% on browse species. Utilization monitoring will take place on key species within key areas when livestock leave the pasture.

Adjustments to this rotation may be needed during the grazing season. Any adjustments to the rotation need to be coordinated and approved by Forest Service one week prior to the scheduled move date. When moving between pastures, livestock need to be completely moved out of the pasture within 3 days of the planned rotation date. You must notify the Forest Service if there is a need to deviate away from the planned move date.

By this letter, I also authorize you, or people working for you, to cut, use or remove any trees needed for fence posts and stays for maintenance of structural range improvements within the Willow Wash Allotment. A copy of this letter must be in possession with you/they while engaged in any tree cutting.

This letter will serve as your Annual Operating Instructions for the 2019 grazing season on the Willow Wash Allotment. If you have any questions, concerns or issues, please contact Kendell, Matt, Andy, or myself at the Black Mesa District Office at (928) 535-7300.

Sincerely,
